From The Chairperson's Desk

The Nursing profession is a matter of pride

for we nursing students and for the society

too. The life is bestowed upon the human-beings by the God Almighty but it is nurtured and protected by the doctors. Yet it is cared and physically cultured by the nurse, who is angel in itself for the patients and physically illing people. The Symbiosis Institute of Nursing was born as Mother Angel in the year 2008. Since its birth it is transforming, reshaping and reforming the young willing girls and boys as expert nurses. Through our consistent training and efforts we make them young angels sharing concern, emotional touch and continuous nursing care for the patients leading them to health and recovery from illness. We do not produce mechanical nurses. We nurture and prepare nurses with human touch and sentiments who is a brother, sister and mother nurse drawing inspiration from great lady Nightingale, the goddess of the nursing world.

Our central commitment is to provide health education and clinical skills. It becomes necessary to develop level of competence, confidence and capability in the students. Nursing is a caring practice comprised of learned scientific discipline guided by sound theoretical plans. The profession of nursing and its lucrative job opportunities exist very widely not only in India but also in overseas countries. Large number of trained and duly qualified nurses are absorbed by the foreign countries.

Rambabu Sharma

(Chairman)

Principal's Desk

Nursing is one of the most sacred professions. Training individuals to be efficient nurses is an art of God. We, at our institution develop students to acquire knowledge, skill and attitude relevant to primary health care setting as well as to cope with emerging problems independently.

Nursing encompasses autonomous and collaborative care of individuals of all age, families, groups and communities, sick or well and in all situations. A nurse extends a caring hand, gives a healing touch, a curing wish and a mother's love unconditionally to a needy patient or to one experiencing trauma. If personal and professional satisfaction is what you are looking for, by caring and saving the lives of others you can pursue nursing as your career.

Highly qualified dedicated faculty and infrastructure helps our students in meeting the challenging requirements of today. Special emphasis has been given to the pursuit of quality education and excellence.

Take this golden eventuality and explore the facilities and opportunities we have for you.

With regards,

Rajender Bhawaria

M.Sc. Nursing (Psychiatric)
